

ECC Within the GBA-UN Framework

ECC's service-first modernization approach aligns with global priorities for transparency, accountability, and strong institutions. We incorporate principles highlighted in the GBA/UN report, including interoperability, auditability, and real-time visibility across complex human services environments.

Modernizing Disability & Human Services

A modern, interoperable pathway designed to reduce administrative burden, strengthen accountability, and improve outcomes for individuals, families, and providers.

Developed in collaboration with leading technical partners.

Our Mission

To modernize disability and human services systems through a service-first, interoperable, and human-centered approach that reduces friction, increases transparency, and strengthens trust across the entire ecosystem.

EmpowerCare Connex (ECC) helps agencies move from fragmented, outdated processes to cohesive, real-time, auditable environments that support better decision-making and more efficient service delivery.

The ECC Difference

- **Blueprint-Driven Modernization**
Designing systems that evolve with policy, procurement, and technology to reduce long-term risk.
- **Stewardship at the Core**
Guiding agencies with clarity and integrity to strengthen oversight and reduce waste, fraud, and abuse.
- **Human-Centered + Future-Ready**
Improving the experience of families, providers, and staff while supporting secure, auditable operations.
- **Interoperability by Design**
Aligning with HIPAA, MITA, and BMM to ensure systems connect, communicate, and scale across programs.
- **Secure, Tamper-Evident Data Practices**
Leveraging blockchain-aligned approaches to support immutable audit trails and seamless data exchange across programs, agencies, and community partners.
